# SURGICAL GOWN

Surgical Gown

Reinforced  
Surgical Gown

Wraparound  
Surgical Gown

Wraparound Reinforced  
Surgical Gown

## MATERIAL TYPES

- SMMS fabrics is composed of two layers of spun bonded fabric and two layers of Melt Blown fabric. With good tensile strength, High filtration and remarkable softness. It prevent and isolate dust particle, alcohol, blood, bacteria and virus.
- Spunless non-woven material offer very high purify because they contain no binders or adhesive. the absence of chemical and thermal binding also produce superior softness and breathable material. the fabrics treated to repels liquid and an excellent shield from bacteria & splashes. the fabrics do not produce allergenic or toxic response in human skin. the fabrics has superior resistance to tearing and maintain approximately 75% of its strength when wet.
- Micro care fabric advanced technology is layer of strong, thin microporous breathable film between two soft, cloth-like fabric layers, to allow vapour to pass easily through while keeping you cool and providing protection from blood and body fluids. Micro care offers excellent barrier against viruses causing infectious diseases, It Level-IV Gown.

DISPOSABLE HEALTHWEAR MANUFACTURER

An ISO 13485:2016, ISO 9001:2016 Certified Company

# DISPOSABLE COVERALL CAP ATTACHED

The Protective Coverall is an economic solution which offers quality and protection from limited chemical splashes.

The material is microporous, allowing air and moisture to escape from within the suit, while helping to protect from the hazard on the outside

## TYPICAL APPLICATIONS

### Popular Choice

- Light industrial cleaning
- Machine maintenance
- Paint spraying & powder coating
- Coating & resin applications
- Crime scene investigation

### Suitable for Consideration

- Asbestos inspection and removal
- Site preparation, insulation.
- Cement manufacturing
- Grinding & polishing
- Pharmaceutical processing & handling toxic powders
- Cleanrooms

### Features and Benefits:

- Excellent barrier against dry particles and certain limited liquid chemical splash
- Laminated microporous material
- 2-way zipper with storm flap for added on-off convenience and extra protection
- Elastic cuffs, waist and ankles for a better fit and freedom of movement
- Super low-linting

DISPOSABLE HEALTHWEAR MANUFACTURER

# DISPOSABLE LAB COAT

The Lab Coats are manufactured from a strong, lightweight, and breathable spunbonded polypropylene (SPP) fabric, which protects against dirt, grime, and certain dry particulates in non hazardous environments. This garment is ideal for less critical areas or pre-gowning entry rooms. It is tested and manufactured in an ISO certified facility and lot controlled and validated through independent laboratory testing.

Colour: White

## WHY SHOULD WE WEAR LAB COATS?

- Lab coats are personal protective equipment and should be worn in the lab when working with chemicals and biologicals to protect the skin and clothing from splatter and spills.
- Appropriate lab coats should be fully buttoned with sleeves rolled down. They should also be fire-resistant.
- In case of an accident, it is much faster and easier to remove a lab coat than street clothes to minimize skincontact with hazardous materials.

## WHEN TO WEAR LAB COATS

- Always wear lab coats when working with hazardous materials.

## CHARACTERISTICS:

- Made of Non-woven spunbonded polypropylene 48grams/m<sup>2</sup> white
- Tapered collar
- Snap closure
- Inset sleeves
- Knitted cuffs
- With 3 pockets
- Serged seams
- Sizes ( S / M / L / XL / 2XL / 3XL )
- Packed per 30 pcs/carton
