## DESCRIPTION

### Crown - Theatre Incise Drape

Crown Incise Drape is a transparent, adhesive polyurethane film which allows the skin to breath, so preventing moisture buildup under the drape. As a result adheres to the surrounding skin throughout long surgical operations and more importantly, right up to the wound edge.

## BENEFITS

- Adheres right up to wound edge :** The drape will provide protection from laterally migrating bacteria because it stays in place even throughout operations involving prolonged retraction of wound edges.
- Transparent non-glare surface :** The incision site is clearly visible without glare.
- Thin but extremely strong :** Crown Incise Drape provides a sterile working field, on to which internal organs may be placed with out fear of contamination.

## INDICATIONS

### All types of surgery:

- Orthopaedic
- Major Abdominal
- Cardio Thoracic
- Pediatric
- Neuro Surgery
- Plastic Surgery
- Ophthalmic

## FEATURES

- Adheres right up to wound edge
- Transparent non-glare surface
- Thin but extremely strong.
- Conformable and elastic
- Provides a sterile working field around the operation site.
- Holds drapes securely in place.
- Each PG-film Incise Drape is sterile and individually wrapped in peel open pouch.
- Sterilization is by ethylene oxide.
- Bacteria and water proof film.

# SURGICAL GOWN

An ISO 13485:2003, ISO 9001:2015 Certified Company

Surgical Gown

Reinforced Surgical Gown

Wraparound Surgical Gown

Wraparound Reinforced Surgical Gown

## MATERIAL TYPES

- SMMS fabrics is composed of two layers of spun bonded fabric and two layers of Melt Blown fabric. With good tensile strength, High filtration and remarkable softness. It prevent and isolate dust particle, alcohol, blood, bacteria and virus.
- Spunless non-woven material offer very high purify because they contain no binders or adhesive. the absence of chemical and thermal binding also produce superior softness and breathable material. the fabrics treated to repels liquid and an excellent shield from bacteria & splashes. the fabrics do not produce allergenic or toxic response in human skin. the fabrics has superior resistance to tearing and maintain approximately 75% of its strength when wet.
- Micro care fabric advanced technology is layer of strong, thin microporous breathable film between two soft, cloth-like fabric layers, to allow vapour to pass easily through while keeping you cool and providing protection from blood and body fluids. Micro care offers excellent barrier against viruses causing infectious diseases, It Level-IV Gown.
